[PsO Section | Page 1]

For all other indications, this policy applies to members who are new to treatment with a targeted immune modulator for the first time. As defined in Aetna commercial policies, health care services are not medically necessary when they are more costly than alternative services that are at least as likely to produce equivalent therapeutic or diagnostic results. Imuldosa (ustekinumab-srif), Otulfi and unbranded Otulfi (ustekinumab-aauz), Pyzchiva and unbranded Pyzchiva (ustekinumab-ttwe), Selarsdi and unbranded Selarsdi (ustekinumab-aekn), Starjemza (ustekinumab-hmny), Steqeyma and unbranded Steqeyma (ustekinumab-stba), unbranded Stelara (ustekinumab), W ezlana (ustekinumab-auub), and Yesintek (ustekinumab-kfce) are more costly to Aetna than other Ustekinumab products.

[PsO Section | Page 2]

Moderately to Severely Active Ulcerative Colitis (UC)

For the treatment of UC, member has a contraindication, intolerance or ineffective response to all of the following available equivalent alternative targeted immune modulators (one-month trial each): both Entyvio, Stelara and either Avsela, Inflectra or

Dashboard -

Access Score Distribution

How many policies fall into each access tier. Higher scores = fewer PA barriers for patients.

Brand Access Comparison

Average Access Score per brand, sorted by access level. Brands on the right face fewer PA restrictions.
